

Chemical storage tanks

- Fabricated chemical storage tanks suitable for a comprehensive range of chemicals over a range of temperatures and concentrations.
- Specially fabricated from Polypropylene or PVC, depending on the chemicals to be stored.
- A bespoke service providing tanks of various length, width and height configurations to store chemicals safely and to suit your specific requirements.
- Simply provide details of your requirements and we will provide a competitive quotation.
- Our in-house manufacturing capability allows us to provide the most cost effective bespoke fabricated chemical storage tanks available.

We can also manufacture ancillary items to suit chemical tanks such as:

- Filter basket
- Mobile tank and trolley

Please contact us if there are any other chemical tank related items you require.
