## Above Ground Combination Pump Stations

- A single piece self contained pump station combining the tank compartment for water storage with the dry compartment which houses the pump set and / or any other equipment.
- All pipework connections between the tank compartment and pump set within the unit.
- Requires only inlet, outlet and overflow and the electrical supply connecting to and from the unit, ensuring "plug and play" easy site installation.
- Large lockable access door for increased security.
- Mounted on a heavy duty galvanized steel skid to allow external positioning.
- Most units can be positioned using fork lift trucks, larger units may require crane lift.
- Available with AB air gap option.
- Available with actual storage capacity options of 2000, 3000, 5000 or 7000 litres.

### Optional items available:

- Equilibrium Float Valves
- Aylesbury Keraflo Delayed Action Float Valves
- Frost Protection
- Bulkhead Lighting
- Electrical Consumer Unit fitted with Breakers, RCD Protected

To enable us to assist with your requirements please contact us providing the following information:

- Actual storage capacity required
- Connection type and sizes required
- Size of the booster set being utilised
- Details of any access restrictions to enable positioning of the unit
