

Access manway range to suit retro - fitting

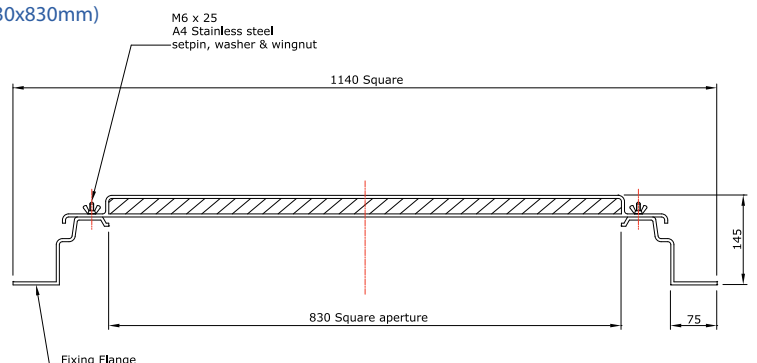

Retro-fit access manway

- Heavy duty Grp construction - robust and lightweight.
- Suitable for fitting to existing tanks and tank lids where insufficient access panels exist.
- An external fixing flange allows the manway to be bolted down to the existing lid.
- Two models available:
Manway 500 RF (520 x 520mm opening)
Manway 830 RF (830 x 830mm opening)
- Suitable for existing tanks manufactured from Grp, pressed steel, profile welded steel and most other materials.
- A cost effective solution to tank access problems without replacement of the whole tank lid.
- Full size replacement tank lids are also available, please telephone or take a look at our website.

Manway 500 -RF
(520x520mm)

Manway 830 -RF
(830x830mm)

Fixing flanges are supplied un-drilled
Fixings & sealant to suit fixing to the existing tank are not included.

Current water regulations require a screened vent to be fitted to the lid of the tank, please see our comprehensive range of screened vents and overflows for these items.
