

Annual Disinfection of Storage Tanks

As a provider of water it is your responsibility to ensure that your storage tanks are inspected annually and cleaned as necessary, with over 20 years in the industry Purewater are on hand to ensure this isn't a problem.

As a manufacturer of storage tanks Purewater are experts in how to ensure a clean water supply, meet current water regulations and maximise the life of your storage tanks.

Annual Tank Inspection and Disinfection

Purewater Environmental Services Ltd adhere to "The control of Legionella bacteria in water system" or ACOP L8 (New edition 2013/14)" which is the Health and Safety Executive's approved code of practice.

ACOP L8 applies to any place where work, trade or business is undertaken, where water is used or stored and where there is a means of creating and transmitting water droplets which maybe inhaled, there by causing a foreseeable risk of exposure to Legionella.

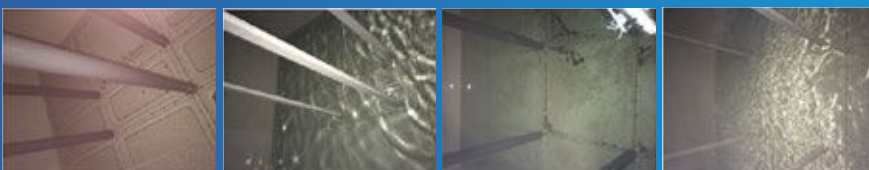

Tank inspection, clean and chlorination of a tank and its services is recommended on an annual basis and when there is visible evidence of any of the following:

- Sediment
- Stagnant water
- Biofilm
- Corrosion
- Flora growth
- Animal Contamination

It is also recommended:

- If the system or part of it has been substantially altered or entered for maintenance or remedial purposes in a manner that may lead to contamination
- During or following an outbreak or suspected outbreak of Legionellosis
